

INFORMATION & DATA ANALYST

Type 2 Solutions

Type 2 Solutions was founded in 2002. Our offices are located in Ridderkerk, The Netherlands. Our client portfolio ranges from medium- to large-size corporations with global operations in the food, chemical and airline sector. We specialize in data management, with a specific focus on data streams surrounding ERP systems.

Job Description

The Information and Data Analyst analyzes business processes and data structures. He/She translates business processes to data structures and vice-versa. He/She combines his findings to create models and/or applications, allowing to address our clients' needs. Data preparation and transformation, as well as data quality control are also part of the tasks of the Data Analyst.

Our expectations

We are looking for candidates that will fulfill the following conditions:

- at least 3 years of relevant working experience;
- higher education or university degree;
- extensive experience with data transformation and integration;
- excellent command of the English language;
- extensive knowledge and hands-on experience of work with abstract data structures and business processes;
- knowledge of at least one major RDBMS*;
- proficiency in SQL, XML, MS Excel;
- excellent communication skills, written and verbal.

Experience in the airline business is a bonus.

** Oracle or DB/2 experience preferred*

Working at Type 2 Solutions

We offer a challenging position in a young, fast-growing company with international clientele. This is a full-time position (40h/week) with a base salary matching your skills and an excellent benefits package.

Applications
